

Waste Advice

It is expected that waste collection will be affected at some stage.

If you have or suspect someone in the household is affected by Coronavirus.

If you suspect you have COVID-19, put waste tissues into a plastic bag and tie it when full. You can also put disposable cloths or wipes, used to clean hard surfaces such as kitchen worktops and bathrooms, in this bag. Once the bag is full, double bag it in a second bin bag and tie it up. Store the bags for 72 hours (three days) and then please place them in your normal wheeled bin. If you don't receive a wheeled bin collection, please make sure a council-issued bag label is placed on the outside of the double-bagged waste.
