Regarding the SID I think it would work the best from somewhere between the Mallard pub and our house as they seem to pick up speed after the roundabout and heading toward the co-op , at the same time (and this would need a another SID) on the opposite side as traffic heads out of the village from the co-op to Church Farm they really pick up speed so we would need a SID there as well, I know this may or may not be doable at this stage but it would help a lot
